Online Learning Platform

Problem Statement: some of the problems in traditional or offline educational system are as follows,

1) The offline classes have their institutes in one place and every student has to make it to their destiny in a different manner. This adds to hours in traveling and preparation.
2) In offline classes, the timings are fixed and there is no leniency.
3) Studying at any offline institute means that the lectures which gave been delivered cannot be repeated. That is a known fact but it is also troublesome for those people who miss their lectures for any circumstances.
4) Students who have been doing offline education since the beginning may not have exposure to technology and it is a loss in the present era of advancing industry

Advantages and Features of Online Learning Platform:

1) Added Flexibility and Self-Paced Learning
2) One of the biggest benefits of e-learning is it's cost effectiveness. The price reduction is the result of educational institutions saving a lot of money on transportation and accommodation of both students and teachers.
3) A prime benefit of online education is that it keeps you in sync with updated content deriving from aspiring lecturers from all around the globe.
4) Lectures Can Be Taken Any Number of Times
5) Offers Access to Updated Content

Features:

1) Students and Teachers Registration
2) Teachers can register and upload courses as well as update content of courses as needed
3) Students Can register and search for courses they want and subscribe to them
4) Subscribe to multiple courses
5) Get notified when content of course updates
6) Dedicated dashboards for teachers and students for tracking activity
